

PR1: Concept Sketch Report

Team 5: MySmartArchery

uc [Model] Model [Model]

**Figure 1: Use Cases**

Description: The archer can start a training session (which includes storing scores and saving the session) or also print a scoresheet.

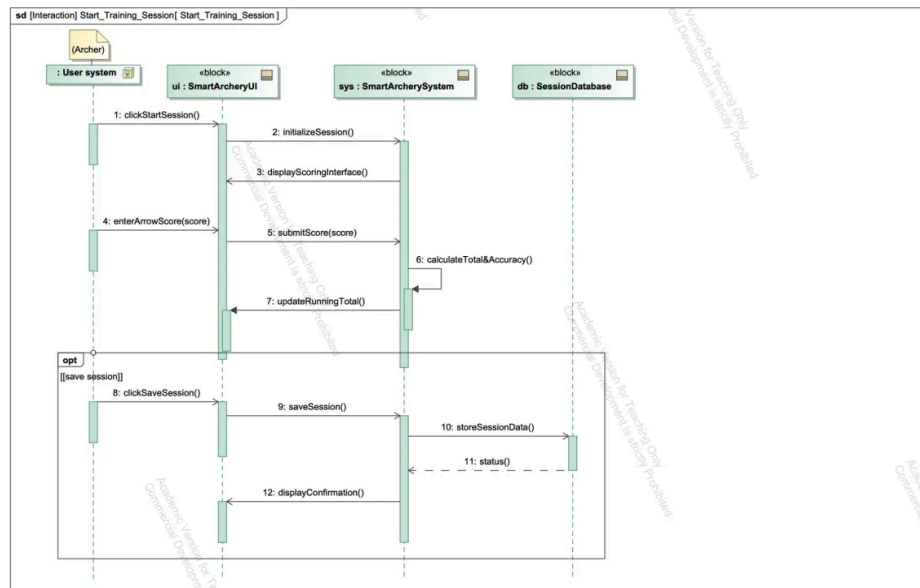

Figure 2: Start Training Session

Description: Archer starts a session, enters arrow scores, and sees a running total updated in real time. Optionally, they can save the session to the database.

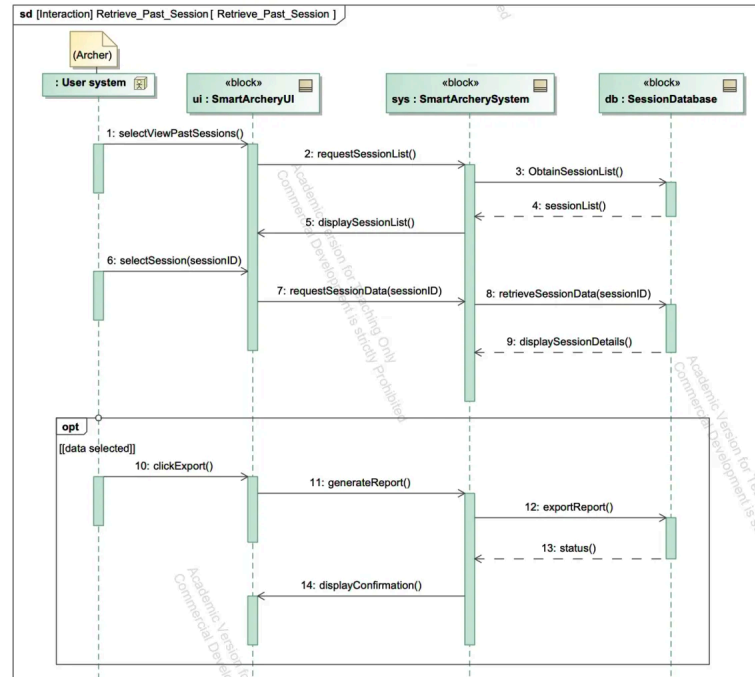

Figure 3: Retrieve Training Session

Description: Archer browses and selects a past session to view its details. Optionally, they can export a report, which gets saved and confirmed.

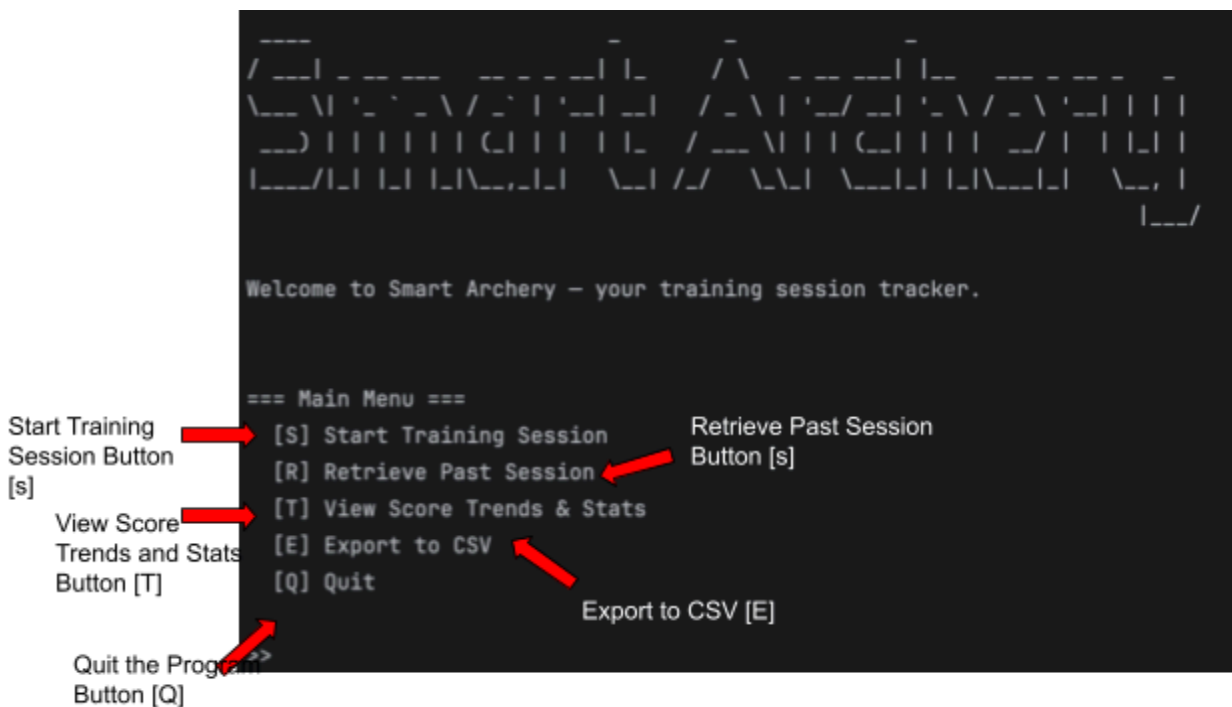

Figure 4: Initial UI Design

Description: Smart Archery CLI main menu displaying five options: Start Training Session, Retrieve Past Session, View Score Trends & Stats, Export to CSV, and Quit – navigated via keyboard input.

APPENDIX: Work Breakdown

Task	Deliverable	Assigned To	Accepted On	Completed
Use Cases & Top Level Diagrams	Model	Aliza Akram and Austin Chapman	Feb 18 2026	Yes
Build MVP	Code + Testing	Ryan Murphy and Kyson Fromm	Feb 18 2026	Yes
Build MVP	Code + Testing	Ryan Murphy	Feb 18 2026	Yes
Research + Prepare Report	Pr2	Chauncey Nguyen	Feb 18 2026	Yes
